Utilization of health promotion resources and control of health condition among healthy elderly people

Daisuke KUWAJIMA¹

¹Graduate School of Health Sciences

Background

- ◎ In Japan, 68.4% of elderly people considered themselves to be “healthy”.
- ◎ It is therefore also necessary to enhance services for health promotion among these healthy elderly people.

Purpose: Researching the needs

This research aimed to clarify how healthy elderly people control their health condition.

This study of significance

This research contribute to enhance services for health promotion that healthy elderly people need and want.

Method: Group interview

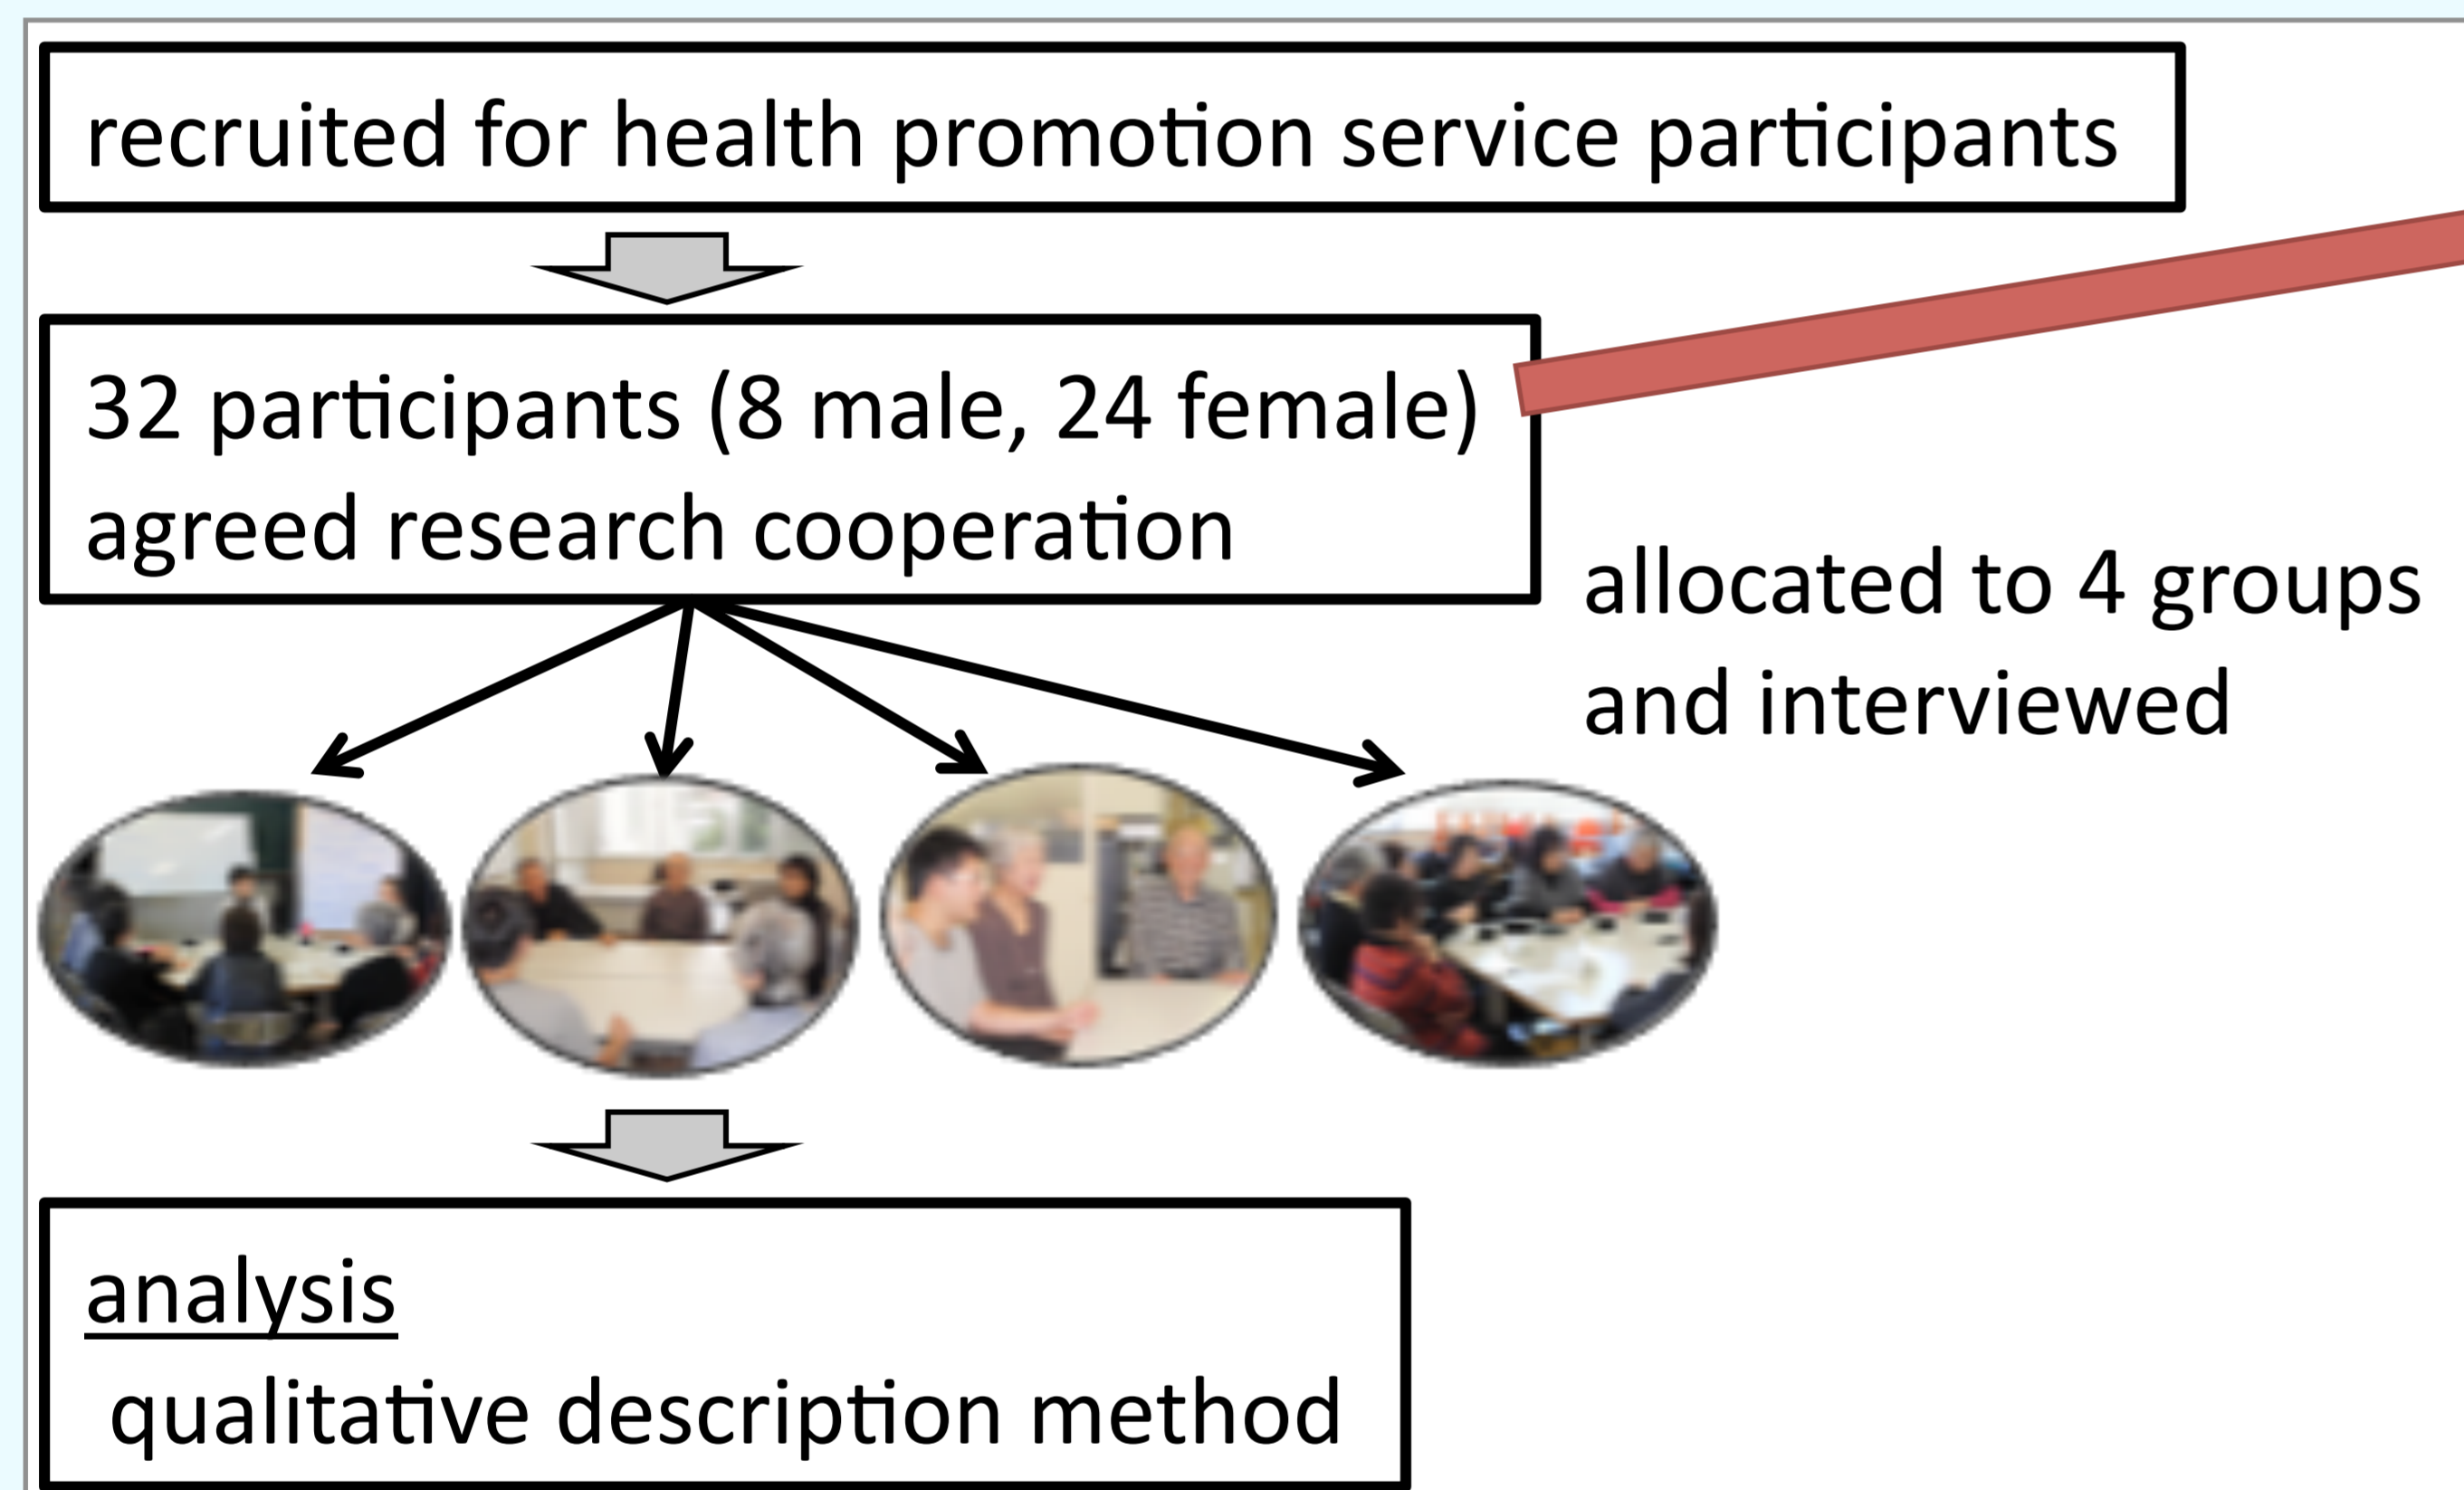

Figure 1. Study flow diagram

Conclusion

- Healthy elderly people want
- through communication with other generations and opposite-sex,** learning and getting stimulated
 - continuing** activities

No participants were dementia and depression.

Table 1. Participants basic information

Age	HDS-R (dementia score)	GDS (depression score)
70.3±4.99	28.6±1.50	3.2±3.12

non \geq 21

non \leq 10 (suspected; 6~10)

validity and reliability assurance

- **Participants checked on** the results of analysis
- Analyzed with co-researchers

Result and Discussion

To control their health condition, they want ...

Result 1

Learning and getting stimulated

through communication with other generations and opposite-sex

<learn what?>

- **various points of view**
- perspective of seniors

<with whom?>

- friends
- young generation
- seniors “senior of lives”

Result 2

Continuing activities

long-term schedule rather than isolated event

◆ **select from several activities**

◆ to adjust various conditions

(e.g.) weather, physical condition, by oneself or group, ...etc

✗ **worry about no choice**

▪ new, interesting, and, possible

▪ at the level of challenge
