- A large majority of workers took induction training, occupations with lower skill levels such as sales workers have the greatest level of up skilling, with the proportions of workers with no high school education attainment expected to decrease under open doors.
- Based on the surveys, salespersons' working time is longer than the new labor law (amended in 2008) regulated. In addition, they do not have extra pay for over-working according to the interview.
- 50% of workers found the working condition is acceptable, and another 30% found that they are satisfied with the current working condition, which reflects that the presence of retail sector looms large in absorbing young labor force than manufacturing industry.

Conclusion

- Retail industry plays a significant role as an entry point to the labor market for fresh job hunters for its low requirement of skills and flexible working time.
- According to the interview and survey, retail sector becomes the leading industry to absorb laid-off workers and migrant workers in Northwest China.
- The sound growth of retail business will open more opportunities for the locals, which will transfer the surplus workforce from the drastic urbanization process.

Proposals for the Development of Retail Sector

- Stimulating rural consuming by increasing farmers' income.
- Stabilizing the real estate market to encourage daily item consuming.
- Improving medical care, to activate the money flow and slow down saving.
- Reforming education system and lessen the burden for tuition expenses.
