1. Overview of Sustainability Weeks 2012

Features of This Year

- Theme : **A Future Society Offering Peace Of Mind For All**
- Core period : Sat, October 6 – Sun, October 21, 2012
- Number of events : 36
- Event period : Sat, September 1– Fri, November 30, 2012
- Number of participants : 5,843
- Points worth special mention:
 - Taking into account the periods in which the Sustainability Weeks were previously organized, the Committee of the Sustainability Weeks, headed by the University's president, decided to fix the core period of the Sustainability Weeks from the last week of October to the first week of November.
 - As part of the preparations for the sixth annual Sustainability Weeks, the Secretariat for Sustainability Weeks invited the public to submit official logo designs and received 197 submissions from across Japan. The logo, selected via internal screening and combining the phrase Sustainability Weeks in English and Japanese, was registered as a trademark, which will be valid until July 12, 2023.
 - The total numbers of events and participants in SW over the last six years, including this year, topped 200 and 50,000, respectively.
 - For the first time in the six-year history of the Sustainability Weeks, events were held outside of Japan: in Finland, Indonesia, Burkina Faso and Nepal. In those events, participants including, but not limited to, researchers, college students and representatives of not-for-profit organizations from those countries and their neighboring countries had lively discussions based on the year's theme.
 - Hokkaido University Library, a United Nations Depository Library, held a forum for the first time as part of the Sustainability Weeks program to promote the global *Stand Up Take Action* campaign to eradicate poverty. It attracted 85 students, faculty, administrative members and local residents.

❖ Greeting from the President

I would like to extend my heartfelt sympathies to the many people living in areas devastated by the earthquake and tsunami of March 11, 2011, who are still inconvenienced in daily life despite the reconstruction efforts that are underway.

A look at the unstable state of world affairs in combination with the energy issues, the natural and man-made disasters that have happened over the past year have made us realize the value of being able to live with a sense of security.

Existence with a worry-free future does not come easily; it must be built based on the wisdom and genuine sincerity of everybody involved. The sixth annual Sustainability Weeks program to be held in 2012 will be titled “A Future Society Offering Peace Of Mind For All.” The program will provide opportunities to discuss solutions to the various global challenges that threaten our lives today.

The 2012 program will offer chances to discuss new ideas both for our campus and for daily life in Hokkaido in an effort to specifically define the type of society we are striving to achieve. The first Sustainability Weeks “Overseas Satellite Program” will also be held abroad, providing opportunities for people involved to visit areas where problems are seen and to talk with local researchers and members of the public

I hope the program will serve as an opportunity for collective consideration of what constitutes the sense of security necessary to protect all life on earth, both today and in the future.

International Dialogue for a Sustainable Future

The IDSF offers an opportunity in which students, researchers, and members of society can collectively share new ideas and approaches in developing an integrated vision of a sustainable society cultivating vital relationships in the process.

For 24 hours via webcast, a dialogue platform in which people across the globe can participate will be created to share visions on sustainability. Ultimately, we hope the IDSF will act as a catalyst that facilitates further innovation in knowledge and social change.

YouTube Channel@

<http://www.youtube.com/user/hokkaidouniv>

Starting from Saturday 6 to Sunday 7 October, 2012

Lusaka GMT+2	Helsinki GMT+1	Beijing GMT+8	Seoul GMT+9	Sapporo GMT+9	Program Lineup
05:00	06:00	11:00	12:00	12:00	12:00 - IDSF Start ! Student anchors will introduce various aspects of the Hokkaido University campus that are embracing sustainability. You can also enjoy the festivities as the campus hosts the first annual "Home Coming Day" for alumni, which will be webcast live.
					Asian Hour
11:00	12:00	17:00	18:00	18:00	18:00 - Students Forum for a Sustainable Future Students from across the globe will discuss sustainability issues.
					World Hour
					20:30 - GiFT ~ Global Issues Forum for Tomorrow since 2011 ~ Four young researchers from Hokkaido University, who are devoting themselves to finding ways to create a safe and sustainable society, will share their cutting-edge research on high-priority global challenges with prospective researchers in both undergraduate and master courses across the globe to call for future collaborations.
17:00	18:00	23:00	00:00	00:00	00:00 - Night Tour Take the overnight campus tour and return to exchange comments through the online dialogue platform.
					EU & African Hour
23:00	00:00	05:00	06:00	06:00	06:00 - The campus in the morning is full of life. The finale will be webcast at the foot of the bronze statue of none other than Dr. Clark, famous for coining the phrase "Boys Be Ambitious."
					American Hour
05:00	06:00	11:00	12:00	12:00	12:00 - IDSF - The end!

2

Public Viewing at the Sustainability Café

10:30-16:00 Sat Oct 6
at HU Conference Hall

Student organized

Enjoy the public viewing of IDSF over a cup of coffee.

What is Sustainability Café?

Sustainability Café is a communication space for visitors to relax offered by the HU Café Project consisting of volunteer students who serve a friendly cup of coffee or tea and perhaps even offer amusing conversation free of charge. The café will be open both on the 6th and 7th of October from 11:00 a.m. to 4:00 p.m. If possible, let's be green and bring your own cup.

Hokkaido University Sustainability Weeks 2012

The Official Logo of SW

This design is based on the concept "sustainable march of the times". The fluidity in the transition of rigid to organic expresses a historical progression with succession toward the future. A harmonious and gradual change in color indicates plurality and diversity in nature, humanity, culture, and society. Looking like a brilliant star or a flower in full bloom from a distance, it symbolizes the resplendent beauty of life. Designed by Mr. Soichi Yamaguchi

Models for a Sustainable Society

Proposing a future society that offers peace of mind for all while harnessing the full potential of Hokkaido.

3

Saturday, Sep 1 - Friday, Nov 30

9:00 ~ 16:00
Depending on weather conditions

Ride on an Experimental E-cart!

Student organized

- a Electric carts will be operated by students to assist the persons who visit the HU Sapporo campus. This complimentary service is to demonstrate an energy resource generated by solar panels on the roofs of buildings in the Graduate School of Environmental Sciences. In the event of an early snowfall, not to worry, the carts are able to traverse snow-laden streets. Stimulating conversation with your driver awaits you when you ride.
- b On the street at HU Sapporo Campus c Japanese d Not required (Charge: Free)
- e IFES-GCOE Regional Education and Outreach Promotion Office, HU
- f Hokkaido Green Purchasing Network g IFES-GCOE Regional Education and Outreach Promotion Office, HU (Contact: N. Yoshimura) TEL: +81-(0)11-706-3355 E-mail: ynobu14001@ees.hokudai.ac.jp URL: http://reo.ees.hokudai.ac.jp/

4

Saturday, Oct 13 & Sunday, Oct 14 (Sat.) Open 12:00 Start 13:00

International Symposium Indigenous Heritage and Tourism Potential in Hokkaido

- a Amid increasing awareness of the relationship between indigenous cultural heritage and its stakeholders, this symposium will describe community efforts using Ainu and other indigenous cultural heritage resources for tourism with an aim to preserve and hand these resources down to the future generations.
- b HU Conference Hall c Japanese/English (Simultaneous interpretation)
- d Not required (Charge: Free) e Center for Ainu and Indigenous Studies, HU
- f Center for Advanced Tourism Studies, HU
- g Center for Ainu and Indigenous Studies, HU (Contact: M.Okada) TEL/FAX: +81-(0)11-706-2859 E-mail: m-okada@let.hokudai.ac.jp

5

Wednesday, Oct 17 Open 12:30 Start 13:00

Business-Academia-Government Collaboration Seminar Developments of Geo-spatial Information and Future World IV

- a Currently, "Geo-spatial Information" is being used to prepare a new digital map of Japan. It will form an information network featuring technologies used in the "Geographical Information System (GIS)" and the "Satellite-based Positioning System". This seminar will discuss the recent trends using geo-spatial information for disaster prevention and the mapping of potential hazards in Hokkaido.
- b HU Conference Hall c Japanese d Not required (Charge: Free) e Graduate School of Letters, HU f GIS Association of Japan Hokkaido Regional Office, Hokkaido GIS/GPS Society, Non-profit Organization "Digital Hokkaido"

7

Sunday, Oct 21 Open 12:30 Start 13:00-17:00

Sustainable Campus Contest 2012

Student organized

- a With the aim of making the Hokkaido University campus sustainable and eco-friendly, a contest will be organized for sharing a wide variety of student-planned project ideas characterized by imaginative thinking and applications of students' research outcomes. A feasibility study will be conducted for the best idea. Call for entries now open!
- b HU Conference Hall c Japanese d Not required (Charge: Free)
- e SCSD (The Students Council for Sustainable Development in HU)

Start 9:20-17:00

The 9th Presentation & Debate Competition, Do we need nuclear power stations? Energy Policy and Hokkaido's Economy

- a** Since the Great East Japan Earthquake, most of Japan's nuclear reactors have remained offline. Against this backdrop, teams of Hokkaido University's undergraduate students will debate whether Japan should continue or phase out its nuclear power generation from the viewpoint of energy policy. Policy implications regarding Hokkaido's economy will also be taken into consideration.

Learning for the Future

Sharing common awareness of the issues and wisdom while nurturing hearts, energy, and friendships to pave the way to a new future.

16 Thursday, Oct 18 Open 18:00 Start 18:10

Hokkaido University x JICA Japanese Volunteers for a Sustainable Society

- a A basic principle of voluntary grass-roots activities, aiming to contribute to sustainable development, is to encourage self-help efforts of those in need, while volunteers live, work, and communicate with them in their language, to develop mutual understanding. Alumni of the Japan Overseas Cooperation Volunteers will report on such activities to encourage participants to join their effort to establish a sustainable world.
- b Lecture Hall, Office of International Affairs, HU c Japanese d Not required (Charge: Free) e JICA HOKKAIDO f Office of International Affairs, HU

Quality of Life

Challenging to create a community whose members enjoy physical, mental, and social well-being as well as a high quality of life.

17 Saturday, Sep 15 Open 9:00 Start 10:00

Public Seminar Toothache Like Pain without Problems within the Tooth

- a This workshop will share the latest research results treating toothaches of unknown causes or phantom toothaches on toothaches of unknown causes. The session will also cover the causes, treatment and courses of recovery for paresthesia, paralysis, discomfort and other symptoms experienced after dental surgery. The event is not only open to dental experts, but also to members of the general public with no specialist knowledge in the field.
- b Conference Hall at School of Dental Medicine, HU c English
- d Required via email, fax or postcards by Sep. 13. (Charge: Free)
- e g Graduate School of Dental Medicine, HU (Contact: T. Arima)
TEL: +81(0)11-706-4275 FAX: +81(0)11-706-4276 E-mail: tar@den.hokudai.ac.jp

18 Saturday, Sep 15 & Sunday, Sep 16 Open 8:30 Start 9:00

Specialized Open Lecture Sustainable Society and Biological Clocks in the Body

- a The biological clock is the internal timing mechanism in all living organisms. Its functions include the adaptation of seasonal changes for instincts such as breeding, hibernation and migration. Studies of the biological clock's interaction with periodic environmental changes contribute to endeavors to create of a sustainable society.
- b HU Conference Hall c Japanese/English d Not Required (Charge: Free)
- e Japanese Society for Chronobiology 19th Annual Meeting
- f g Dept. Chronomedicine, Graduate School of Medicine, HU (Contact: S.Nakamura)

URL: http://www.hs.hokudai.ac.jp/

22 Friday, Oct 12 Open 10:00 Start 10:30

ESD International Symposium Challenge of Education toward a Convivial Society

- a Institutions of higher education have turned out experts in highly specialized disciplines. In an effort to find solutions for problems in the natural environment and for a society at severe risk of being too specialized, this symposium aims to support discussion of the new roles played by the institutes to integrate fragmented knowledge and create a more cohesive society.
- b HU Conference Hall c Japanese/English (Consecutive interpretation)
- d Required via fax or website by Oct. 11. (Charge: Free) e Graduate School of Education, HU f Korea University, Seoul National University g Graduate School of Education, HU (Contact: A. Kawaguchi) TEL: +81(0)11-706-5421
FAX: +81(0)11-706-4951 E-mail: akitok@edu.hokudai.ac.jp

23 Monday, Oct 15 & Tuesday, Oct 16 (Mon.) Open 13:00 Start 13:30-17:00

International Symposium Health and Sustainable Lifestyle of East Asian Children

- a Children's health issues are related to their lifestyles and living environments. They include obesity, low levels of physical fitness and allergies. This symposium will illustrate, based on epidemiological studies, the current status of children in East Asia, and convene discussion on necessary measures for building a healthy, sustainable society for children.
- b HU Conference Hall c Japanese/English (Consecutive interpretation)
- d Required via website, email or fax by Oct.10. (Charge: Free) e Center for Environmental and Health Sciences(CEHC), HU f Faculty of Education / Helth Science, Graduate School of Medicine, HU g CEHC, HU (Contact: A. Araki / M. Komatsu)
TEL: +81(0)11-706-4747 FAX: +81(0)11-706-4725 E-mail: info@cehs.hokudai.ac.jp

24

Thursday, Oct 25

Open 11:40
Start 12:10**Public Seminar****How to Realize an International Cooperation Project;
Fields and practices of consultants in developing countries**

- a** Why don't you devote yourself to sustainable development by utilizing your unique specialties and skills? This seminar will introduce a consulting business in the field of international cooperation, which supports governments and public administration of developing countries in the area of planning, surveying, implementing, and following up. A consultation corner for career counseling is also available for prospective employees.
- b** Humanities and Social Sciences Classroom Building, HU **c** Japanese **d** Not required (Charge: Free) **e** Research Center for Economic and Business Networks (REBN)

26

Saturday, Oct 27

Open 13:00
Start 13:30**Three Open Lectures for High School Students
Information Science and Technology and Life Innovations**

- a** This event will illustrate cutting-edge research in information science and technology to yield innovations. Specifically, associations between science taught at high schools and science and technology studied at college will be highlighted through these three examples: 1. pursuit of chiral molecules, 2. brain surgery simulation, and 3. the wonders of ears and alternative hearing devices.
- b** HU Conference Hall **c** Japanese **d** Not required (Charge: Free)
- e** Graduate School of Information Science and Technology, HU
- f** Sponsorship: Funding Program for Next Generation World-Leading Researchers (NEXT Program) **g** Graduate School of Information Science and Technology, HU (Contact: T. Tateno) TEL: +81-(0)11-706-6763 E-mail: tateno@ist.hokudai.ac.jp

27

Wednesday, Oct 17

Open 18:00
Start 18:30**STAND UP TAKE ACTION in Hokudai**

- a** Hokkaido University will join in a global event to stand up against poverty by hosting an event on campus, which offers guidance on using of the UN Depository Library, and a debrief session of international cooperation activities. It encourages attendees to consider what they can do to eradicate poverty. A group photo of the attendees pledging to take action will be uploaded to the official "STAND UP" website after the event.

Harmony with Nature

Pursuing Balance with earth's natural systems so all living creatures
& humans can coexist in harmony.

29

Monday, Oct 15

Open 12:30
Start 13:00**Japan and China Joint Symposium
Sustainable Sanitation and the Environment and Human
Health Risk Management**

- a** Poverty is considered to contribute to increased incidence of all waterborne diseases, which in turn perpetuate and exacerbate the cycle of poverty. This symposium will discuss solutions to water and sanitation problems around the world based on achievements made by research groups in Japan and China on the Strategic International Research Cooperative Program implemented by the JST.
- b** HU Conference Hall **c** English **d** Not required (Charge: Free)
- e** Graduate School of Engineering, HU **f** Japan Science and Technology Agency (JST) **g** Laboratory of Engineering for Sustainable Sanitation, Department of Environmental Engineering, HU (Contact: A. Hosokawa) FAX: +81-(0)11-706-6270 E-mail: ubnwtse@eng.hokudai.ac.jp

30

Tuesday, Oct 30

Open 17:30
Start 18:00**Sapporo Clock Tower Salon
The Research Faculty of Agriculture Answers your Questions
Nature : Our Food Source**

- a** Agricultural science researchers will outline current affairs in their academic fields, focusing on sustainability, particularly in terms of problems associated with burgeoning deer and other herbivorous animal populations as food, in view of environmental management for harmonious coexistence with nature.
- b** Sapporo Clock Tower **c** Japanese **d** Not required (Charge: Free)

Overview

Takeo Hondoh

Chairperson, Committee of Sustainability Weeks 2012

Executive and Vice-President, Hokkaido University

In 2012, the official logo of the Hokkaido University Sustainability Weeks (SW) event was unveiled, and the sixth SW program was held with a fresh spirit of enthusiasm. Based on the theme of A Future Society Offering Peace of Mind for All, the event provided a forum for discussions to mitigate or eliminate concerns such as the unstable state of international affairs, including the threat of natural disasters and energy problems that affect everybody's lives.

The SW 2012 program began on October 6, coinciding with the first annual Homecoming Day for alumni. The program featured 15 events (or 36 including pre- and post-program sessions) over the 16-day period until October 21.

Summary

The SW 2012 program attracted people from a wide range of academic disciplines, and the events held addressed five general sub-themes:

(1) Models for a Sustainable Society: 9 events

Events to support the proposal of a future society that offers peace of mind for all while harnessing the full potential of Hokkaido

(2) Expanding a Cooperative Network: 5 events

Events to support the enhancement of trans-border cooperation

(3) Quality of Life: 10 events

Events to support the creation of a community whose members enjoy physical, mental and social well-being as well as a high quality of life

(4) Harmony with Nature: 3 events

Events to support the pursuit of balance with earth's natural systems and the appreciation of nature's blessings

(5) Learning for the Future: 9 events

Events to support the sharing of common awareness regarding issues and wisdom while nurturing empathy, energy and friendship to pave the way to a new future

Value of the Sustainability Weeks program

The events held during the Sustainability Weeks program are varied. Those provided every year with steadily progressing discussions include: the Seminar on Environmental Policy co-hosted by the Hokkaido University Public Policy School and the Graduate School of Environmental Science; Sustainable Sanitation and the Environment and Human Health Risk Management (a symposium hosted by the Faculty of Engineering); and the Seminar on the Development of Geo-spatial Information hosted by the Graduate School of Letters. Other events are newly incorporated into the program, such as STAND UP TAKE ACTION in Hokudai hosted by the University Library, seminars held for the first time in several years, and biyearly symposiums not held in 2012. All these events are hosted on the single platform of the Sustainability Weeks program.

This system is adopted because holding events on a single platform produces results different from those gained by arranging them separately. Such outcomes include accelerated identification of issues shared with other academic disciplines, enhancement of HU's visibility in Japan and the international community, and visualization of HU's human and intellectual resources. Particularly noteworthy among these effects is the provision of catalogues detailing HU's social contribution programs to underline the social responsibilities fulfilled by the university in its efforts to address the challenges facing society today. This highlights the value of the Sustainability Weeks program and its worth as a campus-wide event.

For the Future

Since 2005, HU has upheld the theme of sustainable development as part of its international strategy, and this philosophy gave rise to the Sustainability Weeks program in 2007. Against the backdrop of the event's introduction was HU's aspiration to increase its presence in the international community as a university responding to worldwide demand. Now, 2014 will be the last year of the United Nations Decade of Education for Sustainable Development (UNDESD), and 2015 is the target year for the Millennium Development Goals (MDGs). We are entering an era in which the achievements of

universities will be examined as part of efforts to tackle global challenges toward the creation of a better future.

With this in mind, HU plans to summarize its achievements during the Sustainability Weeks 2013 event ahead of global trends to identify pointers for directions to take beyond 2015 and contribute to the international community.

Conclusion

The Sustainability Weeks program is held over a fixed period for the convenience of event planners. In 2013 it will run from the last week of October to the first week of November, with an opening event on the Saturday immediately before this period begins; the specific dates of the event are therefore Saturday October 26 to Sunday November 3.

The program will be organized more effectively than ever as an assembly opportunity for leaders involved in creating sustainable societies around the world and as a chance for HU attendees to present the achievements of their initiatives on campus and elsewhere for evaluation. The continued support and contribution of everybody involved is highly appreciated.
