**THE " OSHORO MARU " CRUISE 216 TO THE NORTHWEST PACIFIC OCEAN**

**IN JUNE-JULY 2010**

1. Cruise Itinerary

Cruise 216

|   |      |    |      |
|---|------|----|------|
| Departure from Hakodate                           | June | 2, | 2010 |
| Start hydrographic research (OS10068)             |      | 3  |      |
| ROV diving trial                                  |      | 4  |      |
| Start mid-water trawl research (OSMT1001)         |      | 13 |      |
| Finish mid-water trawl research (OSMT1005)        |      | 16 |      |
| Arrival at Guam and change research staff         |      | 19 |      |
| Departure from Guam                               |      | 23 |      |
| Start Gillnet research (OSG1005)                  |      | 30 |      |
| Start salmon hook and line research (OSHL1004)    | July | 3  |      |
| Finish Gillnet research (OSG1009)                 |      | 5  |      |
| Date change, repeat July 7 <sup>th</sup>          |      | 7  |      |
| Arrival at Dutch Harbor and change research staff |      | 12 |      |
| Departure from Dutch Harbor                       |      | 15 |      |
| Start salmon long line research (OSSL1001)        |      | 17 |      |
| Date change, skip July 21                         |      | 20 |      |
| Finish salmon long line research (OSSL1006)       |      | 22 |      |
| Finish salmon hook and line research (OSHL1015)   |      | 26 |      |
| Finish hydrographic research (OS10175)            |      | 29 |      |
| Return to Hakodate                                |      | 31 |      |

Total coverage 9369.5miles 55days at sea and 5days in port

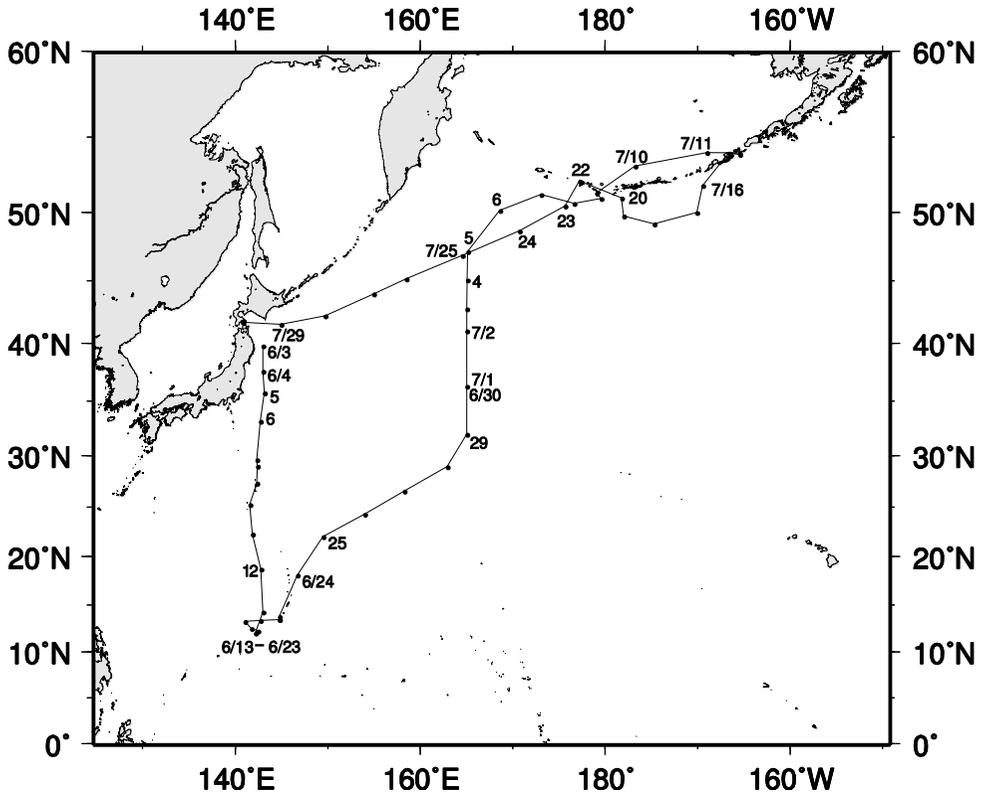

Figure 1. Track and Noon position

## 2. Vessel Personnel

|          |                 |                     |                   |
|----------|-----------------|---------------------|-------------------|
| Captain: |                 | Associate Professor | Shogo Takagi      |
| Crew:    | Chief Officer   | Instructor          | Yoshihiko Kamei   |
|          | First Officer   | Instructor          | Keiichiro Sakaoka |
|          | Second Officer  | Technical official  | Naoki Hoshi       |
|          | Third Officer   | Technical official  | Takuzo Abe        |
|          | Science Officer | Technical official  | Keiri Imai        |
|          | Chief Engineer  | Instructor          | Jyunichi Kimura   |
|          | And 24 men      |                     |                   |

### Cruise 216

|                         |  |  |                    |
|-------------------------|--|--|--------------------|
| Research Staff:         | Instructor   | (Field Science Center for Northern Biosphere, Hokkaido University)   |                    |
|                         | Hakodate - Guam  |  | BOWER John Richard |
|                         | Associate Professor  | (Marine Biosciences Laboratory of Comparative Physiology)            |                    |
|                         | Hakodate - Guam  |  | Shigeho Ijiri      |
|                         | Research Fellow  | (Graduate School of Information and Technology GCOE)                 |                    |
|                         | Hakodate - Guam  |  | Toshiro Iwamori    |
|                         | Instructor   | (Laboratory of Marine Environmental Science)                         |                    |
|                         | Guam - Hakodate  |  | Hinomichi Ueno     |
|                         | Research Worker  | (Plant Research Department, National Museum of nature and Science)   |                    |
|                         | Guam -Hakodate   |  | Kaoru Ohgane       |
|                         | Instructor   | (Laboratory of Marine Environmental Science)                         |                    |
|                         | Hakodate - Dutch Harbor  |  | Hiroji Onishi      |
|                         | Associate Professor  | (Faculty of Fisheries Training Ship Oshoro-Marui)                    |                    |
|                         | Hakodate - Guam  |  | Yoshiyuki Kajiwara |
|                         | Study Chief Editor   | (Plant Research Department, National Museum of nature and Science)   |                    |
|                         | Hakodate - Guam  |  | Akihiro Tsuji      |
|                         | Instructor   | (Graduate School of Science, University of Tokyo)                    |                    |
|                         | Hakodate - Guam  |  | Yoshihiro Niwa     |
|                         | Associate Professor  | (Laboratory of Marine Environment and Resource Sensing)              |                    |
|                         | Hakodate - Dutch Harbor  |  | Toru Hirawake      |
|                         | Associate Professor  | (TEIKYO University of Science & Technology)                          |                    |
|                         | Hakodate - Guam  |  | Kyoichi Mori       |
|                         | Associate Professor  | (Laboratory of Marine Biodiversity)                                  |                    |
|                         | Hakodate - Hakodate  |  | Atsushi Yamaguchi  |
|                         | Instructor   | (Field Science Center for Northern Biosphere, Hokkaido University)   |                    |
|                         | Hakodate - Guam  |  | Jun Yamamoto       |
|                         | Researcher   | (Atmosphere Ocean Research Institute University of Tokyo)            |                    |
|                         | Hakodate - Guam  |  | Shun Watanabe      |
|                         | Professor  | (Division of Bioengineering and Bioinformatics, Hokkaido University) |                    |
|                         | Hakodate - Guam  |  | Hidemi Watanabe    |
| Graduate Students       | 9 persons  |  |                    |
| Under Graduate Students | 12 persons   |  |                    |
| Foreign Scientists:     | (Pacific Aquaculture and Coastal Resources Center, University of Hawaii at Hiro) |  |                    |
|                         | Hakodate - Hakodate  |  | Keiko Sekiguchi    |
|                         | Total 37 persons   |  |                    |

### 3. Items and Objects of Research

#### Items

|  |        |              |
|--|--------|--------------|
| Hydrographic observation by CTD, X-CTD XCP, and VMP-5500 casts:                  | Fig. 2 | Table 1, 2   |
| Biological research for fishes caught by non-selective drift gillnets:           | Fig. 3 | Table 3 - 8  |
| Salmon longline and hook-and-line research:                                      | Fig. 4 | Table 9 - 11 |
| Biological research for fishes caught by mid-water trawl observations:           | Fig. 5 | Table 12, 13 |
| Biological research for squid caught by jigging:                                 |        |              |
| Plankton samplings by NORPAC-net, MTD-net, Closing-net, Bongo-net, and VMPS-net: |        | Table 14     |
| Sediment sampling and observation by ROV and Smith-McIntyre Grab:                |        |              |
| Water samplings by Niskin bottles and underwater tug plane:                      |        | Table 16     |

#### Objects

CTD, X-CTD, and ADCP observation are performed, Recovery and installation of sediment-traps are performed for the purpose of investigating correspondence with a climate change and relation of an east-and-west subarctic gyre.

Study on experimental biology of marine zooplankton in the northern North Pacific.

Sediment sampling and observation on the abyssal sea floor by a ROV and sediment samplers in the continental shelf break off Sanriku, around Ogasawara Islands and Guam.

Bio-optical measurement using underwater radiometer and absorption/scattrometer.

Investigation of eel.

Persistent Organic Pollutants (POPs) in Oceanic Squids.

Marine mammal shipboard sighting survey.

Radiolarian and a study of a Classification the Habits of the Symbiosis Alga.

In order to clarify the relation between micro-scale (~1cm) and fine-scale(~10cm) current shear in the deep ocean , we carry out micro-scale measurements using TurboMAP D2 and fine-scale measurements using XCP simultaneously.

Recoveries of two sediment traps.

Study on geochemistry and metal distributions in the water along the 170E line, Bering Sea.

Vertical distribution of diatom assemblages using sea waters obtained with CTD observation

Geographical distribution of diatom and radiolarian assemblages using plankton tows obtained with Twin Norpac plankton net.

Research of growth, feeding ecology and trophic dynamics of Pacific salmon in the North Pacific.

#### 4. Data on Temperature, Salinity and Computed Dynamic Depth Anomaly

Hydrographic work on deck and the data processing were made by the deck officers, crews, research staff and cadets of the “Oshoro Maru”. Temperature and salinity were measured by CTD (Seabird SBE9Plus and SBE-19). Dynamic computations were made using a desk-top computer aboard the “Oshoro Maru”.

## 5. Data on drift gillnet research

Five gillnet researches were performed during this cruise. The operations were supervised by the captain, and were conducted by deck officers, crews and research staff.

Table 7-1. The number of organisms caught by drift gillnet during the Oshoro maru Cruise # 216, Leg 2, in late June to early July, 2010. CPUE and (%) indicate numerical catch per tan and percentage of total catch by C-gear gillnet at the station, respectively.

Table 7-2. The number of organisms caught by drift gillnet during the Oshoro maru Cruise # 216, Leg 2, in late June to early July, 2010. CPUE and (%) indicate numerical catch per tan and percentage of total catch by C-gear gillnet at the station, respectively.

## 6. Salmon Longline and Hook-and-Line Research

### [Longline Sampling]

Six operations using a salmon longline were performed. Ten baskets (hachi) of salmon longline were used in each operation. Basket was composed of 111 m of main line with 49 branch lines and 127m of main line with 34 branch lines. The branch lines, each with hooks hung to about 2m depth. These operations were supervised by the captain, Deck officers, crews, cadets, and research staffs were engaged in the work.

### [Hook-and-Line Sampling]

To collect salmons, hook-and-line gears were used in the Central North Pacific and in the Bering Sea during Cruise#216. Five to ten anglers were engaged in the work. These samplings were mainly conducted with observations when ship was under drifting.

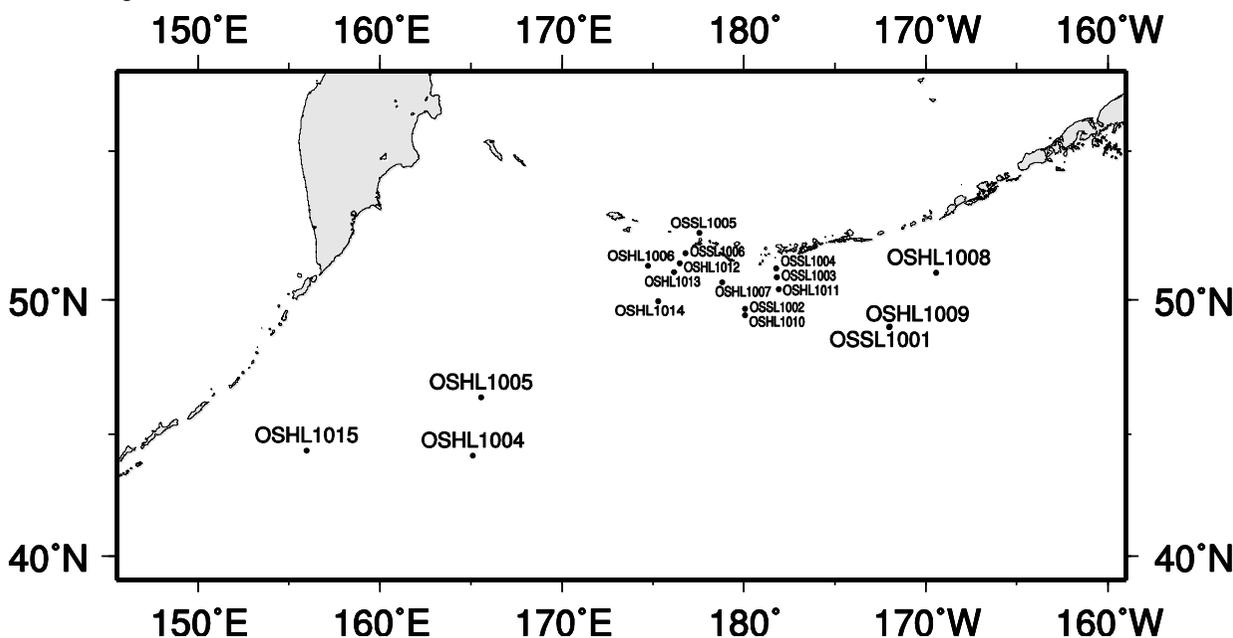

Figure 4. Location of salmon longline and hook-and-line research

Table 9. List of hook-and-line sampling (OSHL 10XX) station and salmon long line sampling (OSSL 10XX) station during the "Oshoro Maru" Cruise #216

| Station   | Date and Time (S.M.T.) |               |         |          | Set Position |     | D.S. | No. of hooks | Wr.    | Wind (Force) | Oceanographic Station No. |
|-----------|------------------------|---------------|---------|----------|--------------|-----|------|--------------|--------|--------------|---------------------------|
|           | Line set               | Line haul     | T.D.    | Lat.     | Long.        |     |      |              |        |              |                           |

## 7. Data on mid-water trawl research

Five operations of the stern otter trawl were carried out. These operations were supervised by the captain, Deck officer, crew, research staff, and cadets were engaged in the work.

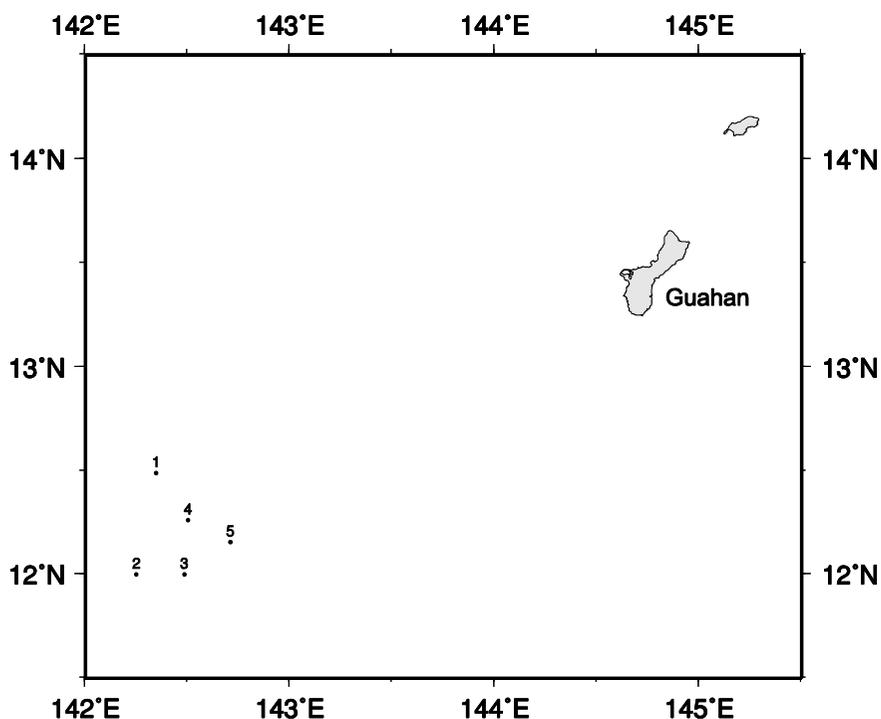

Figure 5. Locations of mid-water trawl research

Table 12. Data on mid-water trawl research during the “Oshoro Maru” Cruise #216

| No. of research | Date and time of net tow (S.M.T.) |           | Position |          | Direction of tow | Speed of tow (K' t) | Bottom depth(m) | Wr | Wind   |

## 8. Data on plankton collected by vertical hauls with a single or twin NORPAC net.

Vertical hauls with a single or twin-NORPAC net were made at hydrographic stations. This net was composed of 45 cm mouth diameter and 180 cm long conical one which was made of GG54 and XX13 having 0.33 mm and 0.10 mm mesh, respectively. The net was lowered to the estimated depth of 150 m, 500 m or near the bottom when the bottom depth was shallower than 150 m, and immediately hauled to the surface at a speed about 1 m s<sup>-1</sup>. A flowmeter was mounted at the center of mouth of the net to estimate the volume water filtered. Sampling was conducted by research staffs and measurement of wet weight of the samples were made by A. Yamaguchi, K. Ishii, K. Matsuno, R. Saito, K. Ohgi, Y. Onishi, T. Homma, R. Ohashi, C. Tsukazaki, A. Kuroda, Y. Abe, M. Kawaguchi, T. Shiota, S. Mizuhara, K. Moribe and J. Fukuda (Laboratory of Marine Biology).

- 1) Exclusively phytoplankton
- 2) Including some fragments of medusae.
- 3) *Neocalanus* abundant.
- 4) Gelatinous zooplankton abundant.
- 5) *Salpida* abundant.
- 6) Chaetognaths abundant.

Table 14. Data on plankton collected by vertical hauls with a single or twin NORPAC net. (continued)

## 9. Data on Calibration of Flowmeters

Flowmeters used for plankton nets were calibrated once in the cruise.

Table 15. Calibration data on flowmeters used for a twin NORPAC net and other kind of nets.

100-m wire out at 13°16'N, 141°11'E in 17 June 2010.

| Flowmeter No. | Wire length (m) | Revolution |       |      |       |      |      |       | Mean |

## 10. Data on nutrients

Seawater samples were collected with Niskin bottles on the CTD system. The samples for nutrient analysis were stored in polyethylene bottles and kept in a freezer at -20. Nutrients were analyzed in the laboratory with Technicon Auto-analyzer.

Table 16. Data on nutrients
