Supporting Information

Our recently published work (*Chem. Mater.* 2020, 32 (19), 8576–8586; DOI: 10.1021/acs.chemmater.0c02911) referred to a Supporting Information (Video S1). However, the video file was not included and is provided now within this Addition and Correction. The video shows the mechanical weakness of the pure first and second single-network cryogels and the significant enhancement of the mechanical properties of the corresponding double-network cryogel.
